1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)

1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)		
		Total persons, 2005	Total persons, 2000	Per- cent change, 2000– 2005	Per square kilo- meter, 2005	Foreign- born, 2000	Same resi- dence in 1995 and 2000	Median house- hold income (dollars)	Percent		High school diploma or less	Bach- elor's degree or more	Percent in labor force	Unem- ployment rate	Family	One person	
									Income of \$100,000 or more	Income below poverty level

1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)	
		Total persons, 2005	Total persons, 2000	Per- cent change, 2000– 2005	Per square kilo- meter, 2005	Foreign- born, 2000	Same resi- dence in 1995 and 2000	Median house- hold income (dollars)	Percent		High school diploma or less	Bach- elor's degree or more	Percent in labor force	Unem- ployment rate	Family	One person
									Income of \$100,000 or more	Income below poverty level

1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)	
		Total persons, 2005	Total persons, 2000	Per- cent change, 2000– 2005	Per square kilo- meter, 2005	Foreign- born, 2000	Same resi- dence in 1995 and 2000	Median house- hold income (dollars)	Percent		High school diploma or less	Bach- elor's degree or more	Percent in labor force	Unem- ployment rate	Family	One person
									Income of \$100,000 or more	Income below poverty level

1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)	
		Total persons, 2005	Total persons, 2000	Per- cent change, 2000– 2005	Per square kilo- meter, 2005	Foreign- born, 2000	Same resi- dence in 1995 and 2000	Median house- hold income (dollars)	Percent		High school diploma or less	Bach- elor's degree or more	Percent in labor force	Unem- ployment rate	Family	One person
									Income of \$100,000 or more	Income below poverty level

1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)	
		Total persons, 2005	Total persons, 2000	Per- cent change, 2000– 2005	Per square kilo- meter, 2005	Foreign- born, 2000	Same resi- dence in 1995 and 2000	Median house- hold income (dollars)	Percent		High school diploma or less	Bach- elor's degree or more	Percent in labor force	Unem- ployment rate	Family	One person
									Income of \$100,000 or more	Income below poverty level

1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)	
		Total persons, 2005	Total persons, 2000	Per- cent change, 2000– 2005	Per square kilo- meter, 2005	Foreign- born, 2000	Same resi- dence in 1995 and 2000	Median house- hold income (dollars)	Percent		High school diploma or less	Bach- elor's degree or more	Percent in labor force	Unem- ployment rate	Family	One person
									Income of \$100,000 or more	Income below poverty level

1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)	
		Total persons, 2005	Total persons, 2000	Per- cent change, 2000– 2005	Per square kilo- meter, 2005	Foreign- born, 2000	Same resi- dence in 1995 and 2000	Median house- hold income (dollars)	Percent		High school diploma or less	Bach- elor's degree or more	Percent in labor force	Unem- ployment rate	Family	One person
									Income of \$100,000 or more	Income below poverty level

1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)	
		Total persons, 2005	Total persons, 2000	Per- cent change, 2000– 2005	Per square kilo- meter, 2005	Foreign- born, 2000	Same resi- dence in 1995 and 2000	Median house- hold income (dollars)	Percent		High school diploma or less	Bach- elor's degree or more	Percent in labor force	Unem- ployment rate	Family	One person
									Income of \$100,000 or more	Income below poverty level

1. Data for serious crimes have not been adjusted for underreporting. This may affect comparability between geographic areas over time.

2. Per 100,000 population estimated by the FBI.

3. Based on population estimated as of July 1 of the year shown.

Table B. Incorporated Places and Minor Civil Divisions (MCDs) of 10,000 or More Population —
Land Area, Population, Households, Educational Attainment, and Employment

Place	Land area, ¹ 2000 (sq km)	Population				Population characteristics		Household income and poverty, 1999			Educational attainment, ² 2000 (percent)		Employment, ³ 2000		Households, 2000 (percent)		
		Total persons, 2005	Total persons, 2000	Per- cent change, 2000– 2005	Per square kilo- meter, 2005	Foreign- born, 2000	Same resi- dence in 1995 and 2000	Median house- hold income (dollars)	Percent		High school diploma or less	Bach- elor's degree or more	Percent in labor force	Unem- ployment rate	Family	One person	
									Income of \$100,000 or more	Income below poverty level

APPENDIX A

GEOGRAPHIC CONCEPTS

This volume presents data for places and minor civil divisions (MCDs). These two types of geographic areas are similar and often represent the same location. Although they are presented separately in most data sources, this volume combines them to simplify analysis in the 12 states where MCDs serve as general-purpose local governments.

Table A includes data for all places and MCDs, regardless of size. Table B includes incorporated places and MCDs with a 2005 estimated population of 10,000 or more. Table C includes incorporated places with a 2000 census population of 2,500 or more and MCDs with a 2000 census population of 10,000 or more in the 12 applicable states.

PLACES

The places for which data are presented in this volume include incorporated places, Census designated places (CDPs), and consolidated cities.

Incorporated Places

Incorporated places included in this volume are those reported to the Census Bureau as being legally in existence on July 1, 2005, under the laws of their respective states as cities, boroughs, cities and boroughs, municipalities, towns, and villages, with the following exceptions: the towns in the New England states, New York, and Wisconsin; the boroughs in New York; and the townships in Michigan, Minnesota, New Jersey, and Pennsylvania are recognized as minor civil divisions for decennial census purposes; the boroughs, city and borough (Juneau City and Borough), and municipality (Anchorage) in Alaska are county equivalents for decennial census statistical presentation purposes. There are a few incorporated places that do not have a legal description. An incorporated place is established to provide governmental functions for a concentration of people, as opposed to a minor civil division, which generally is created to provide services or administer an area without regard, necessarily, to population.

Census Designated Places (CDPs)

Census designated places (CDPs) are delineated for each decennial census as the statistical counterparts of incorporated places. CDPs are delineated to provide census data for concentrations of population, housing, and commercial structures that are identifiable by name but not located within an incorporated place. CDP boundaries are usually defined in

cooperation with state, local, and tribal officials. These boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place or other legal entity boundary, have no legal status, nor any officials elected to serve traditional municipal functions. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as a CDP in an earlier census does not necessarily have the same boundary.

For the 2000 census, and for the first time, CDPs did not need to meet a minimum population threshold to qualify for tabulation of census data. For the 1990 census and earlier censuses, the Census Bureau required CDPs to qualify on the basis of various minimum population size criteria. Hawaii is the only state that has no incorporated places recognized by the Census Bureau. All places shown in the data products for Hawaii are CDPs. By agreement with the state of Hawaii, the Census Bureau does not show data separately for the city of Honolulu, which is coextensive with Honolulu County.

Consolidated Cities

A consolidated city is a unit of local government for which the functions of an incorporated place and its county or MCD have merged. The legal aspects of this action may result in both the primary incorporated place and the county or MCD continuing to exist as legal entities, even though the county or MCD performs few or no governmental functions and has few or no elected officials. In places where this occurs, and in places where one or more other incorporated places in the county or MCD continue to function as separate governments (despite having been included in the consolidated government), the primary incorporated place is referred to as a consolidated city. This volume contains data for seven consolidated cities: Milford, CT; Athens-Clarke County, GA; Augusta-Richmond County, GA; Indianapolis, IN; Louisville-Jefferson County, KY; Butte-Silver Bow, MT; and Nashville-Davidson, TN.

Minor Civil Divisions (MCDs)

The primary political divisions of most states are termed counties. Minor civil divisions (MCDs) are the primary governmental or administrative divisions of a county in many states (parish in Louisiana). MCDs represent many different kinds of legal entities with a wide variety of governmental and/or administrative functions. They are variously designated as American Indian reservations, assessment districts, boroughs, charter townships, election districts, election precincts, gores, grants, locations, magisterial districts, parish governing authority districts, plantations, precincts, purchases, road districts, supervisors' districts, towns, and

townships. In some states, all or some incorporated places are not located in any MCD (independent places) and thus serve as MCDs in their own right. In other states, incorporated places are part of the MCDs in which they are located (dependent places), or the pattern is mixed—some incorporated places are independent of MCDs and others are included within one or more MCDs. In Maine and New York State, there are American Indian reservations and off-reservation trust lands that serve as MCD equivalents; a separate MCD is created when the American Indian area crosses a county boundary.

The MCDs in 12 states (Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin) also serve as general-purpose local governments that can typically perform the same governmental functions as incorporated places. The Census Bureau presents data for these MCDs in all data products

providing information for places. In this volume, MCDs are included for these 12 states.

In Tables A and B, the name of each MCD is followed by its county name in parentheses and the notation “MCD.” Where an MCD is co-extensive with an incorporated place, only a single listing is included. Where an MCD is co-extensive with a CDP, only the MCD is included.

In Table C, the MCDs are not identified as such, but generally are called “town” or “township” depending on local use. Although Tables A and B contain data for complete MCDs, including any incorporated places within a town, many listings of towns in Table C represent the portion of the town that is outside of any incorporated places. These partial towns are identified as “balances.”

APPENDIX B

SOURCE NOTES AND EXPLANATIONS

TABLE A
ALL PLACES

Table A presents 2005 population estimates and data from the 2000 Census of Population and Housing for all incorporated places and consolidated cities, as well as for minor civil divisions (MCDs) in the 12 states where MCDs serve as general purpose local governments. Data from the 2000 census are also included for Census designated places (CDPs). The Census Bureau provides 2005 population estimates for 31,382 of the geographic entities included in this table: 19,464 incorporated places, 7 consolidated cities, and 11,904 MCDs (in the 12 applicable states). Table A also includes 5,546 CDPs that had not become incorporated cities or MCDs by 2005. Some cities that incorporated between 2000 and 2005 were CDPs in the 2000 census, but their populations were not necessarily the same as the corresponding CDPs. Thus, Table A does not include 2000 census data for them. The total number of entities in Table A has been reduced to 33,824 by eliminating duplicate entities. Where an MCD is co-extensive with an incorporated place, only a single listing is included.

2005 POPULATION, Items 1 and 3 **Source: U.S. Census Bureau—Population Estimates**

The population data for 2005 are Census Bureau estimates of the resident population as of July 1, 2005.

2000 POPULATION, Items 2 and 3 **Source: U.S. Census Bureau—2000 Census of Population and Housing**

The population data for 2000 are from the 100 percent count of the 2000 census and represent the resident population as of April 1, 2000.

POPULATION BY RACE, Items 4–7 **Source: U.S. Census Bureau—2000 Census of Population and Housing**

The data on race were derived from answers to the question on race that was asked of all persons. The concept of race, as used by the Census Bureau, reflects self-identification by persons according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national origin groups.

In the 2000 census, respondents were offered the option of selecting one or more races. This option was not available in prior censuses, so comparisons between censuses should be made with caution. In this table, items 4 through 7 refer to individuals who identified with each racial category, either alone or in combination with other races. Because respondents could include as many categories as they chose, and since the columns refer to the percentage of the population, the total will often be more than 100 percent.

The **White** population is defined as persons who indicated their race as White, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire but entered a nationality such as Irish, German, Italian, Lebanese, Near Easterner, Arab, or Polish.

The **Black** population includes persons who indicated their race as “Black, African Am., or Negro,” as well as persons who did not classify themselves in one of the specific race categories but reported entries such as African American, Afro American, Kenyan, Nigerian, or Haitian.

The **American Indian or Alaska Native** population includes persons who indicated their race as American Indian or Alaska Native, as well as persons who did not classify themselves in one of the specific race categories but reported entries such as Canadian Indian, French-American Indian, Spanish-American Indian, Eskimo, Aleut, Alaska Indian, or any of the American Indian or Alaska Native tribes.

The **Asian and Pacific Islander** population combines two census groupings: **Asian** and **Native Hawaiian or Other Pacific Islander**. Because two separate groups are combined, this category occasionally represents more than 100 percent of a city’s population.

The **Asian** population includes persons who indicated their race as Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese, or “Other Asian,” as well as persons who provided write-in entries of such groups as Cambodian, Laotian, Hmong, Pakistani, or Taiwanese.

The **Native Hawaiian or Other Pacific Islander** population includes persons who indicated their race as “Native Hawaiian,” “Guamanian or Chamorro,” “Samoan,” or “Other Pacific Islander,” as well as persons who reported entries such as Part Hawaiian, American Samoan, Fijian, Melanesian, or Tahitian.

HISPANIC ORIGIN, Items 8 and 9

Source: U.S. Census Bureau—2000 Census of Population and Housing

The **Hispanic population** is based on a complete-count question that asked respondents “Is this person Spanish/Hispanic/Latino?” Persons who marked any one of the four Hispanic categories (i.e., Mexican, Puerto Rican, Cuban, or other Spanish) are collectively referred to as Hispanic.

The **Non-Hispanic White** number in item 8 includes only those persons who were not Hispanic and whose race was “White only.”

In the 2000 census, the Hispanic origin question was placed before the race question and specific instructions indicated that both questions should be answered.

AGE, Items 10–12

Source: U.S. Census Bureau—2000 Census of Population and Housing

Age is defined as age at last birthday (number of completed years since birth), as of April 1 of the census year. The 2000 census also asked for the specific date of birth of the respondent, and 2000 census procedures used the birth date for deriving age data. For this reason, it is likely that the 2000 data have fewer problems than prior censuses, such as the tendency of respondents to round ages or report the person’s age on the date the questionnaire was filled out rather than on April 1.

HOUSEHOLDS, Items 13–16

Source: U.S. Census Bureau—2000 Census of Population and Housing

A household consists of persons occupying a single housing unit. A housing unit is a house, an apartment, a group of rooms, or a single room occupied as separate living quarters. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share a housing unit. The number of households is the same as the number of year-round occupied housing units.

A housing unit is **owner occupied** if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. The owner or co-owner must live in the unit and usually is Person 1 on the census questionnaire. Item 14 shows the percentage of **households** (not housing units) that are owner occupied.

Item 15 represents the percentage of households with 1 or more persons under 18 years old, whether or not they are related to the householder. Similarly, item 16 represents the percentage of households with one or more persons age 65 years and over.

TABLE B

INCORPORATED PLACES AND MINOR CIVIL DIVISIONS OF 10,000 OR MORE POPULATION

Table B presents data from several sources for incorporated places and consolidated cities with 2005 estimated populations of 10,000 or more, as well as minor civil divisions (MCDs) with 10,000 or more population (in the 12 states where MCDs serve as general purpose local governments). There are 3,668 geographic entities in Table B. Where an MCD is co-extensive with an incorporated place, only a single listing is included.

LAND AREA, Items 1 and 5

Source: U.S. Census Bureau—2000 Census of Population and Housing

Land area measurements are shown to the nearest square kilometer. Land area includes dry land and land temporarily or partially covered by water, such as marshlands, swamps, and river floodplains. To convert these area measurements into square miles, square kilometers may be divided by 2.59. Item 5 shows the population density using the 2005 population estimate, but land area is from the 2000 census.

2005 POPULATION, Items 2 and 4

Source: U.S. Census Bureau—2005 Population Estimates

The population data for 2005 are Census Bureau estimates of the resident population as of July 1, 2005.

2000 POPULATION, Items 3 and 4

Source: U.S. Census Bureau—2000 Census of Population and Housing

The population data for 2000 are from the 100 percent count of the 2000 census and represent the resident population as of April 1, 2000.

POPULATION CHARACTERISTICS, Items 6 and 7

Source: U.S. Census Bureau—2000 Census of Population and Housing

The **foreign-born population** includes all persons who were not U.S. citizens at birth. Foreign-born persons are those who indicated they were either a U.S. citizen by naturalization or were not a citizen of the United States. Census 2000 does not ask about immigration status. The population surveyed included all persons who indicated that the United States was their usual place of residence on the census date. The foreign-born population consists of immigrants (legal permanent residents), temporary migrants (students), humanitarian migrants (refugees), and unauthorized migrants (persons illegally residing in the United States).

Persons who lived in the **same house in 1995 and 2000** include all persons 5 years of age and over who did not move during the 5 years, as well as those who had moved but had returned to their 1995 residence by Census Day.

HOUSEHOLD INCOME, Items 8–10
Source: U.S. Census Bureau—2000 Census of Population and Housing

Household income includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income. Although the household income statistics cover calendar year 1999, the characteristics of individuals and the composition of households refer to the time of enumeration (April 1, 2000). Thus, the income of the household does not include amounts received by individuals who were members of the household during all or part of calendar year 1999 if these individuals were no longer residing in the household at the time of enumeration. Similarly, income amounts reported by individuals who did not reside in the household during 1999 but who were members of the household at the time of enumeration are included. However, the composition of most households was the same during 1999 as at the time of enumeration.

Total income is the sum of the amounts reported separately for wage or salary income; net self-employment income; interest, dividends, or net rental or royalty income or income from estates and trusts; Social Security or railroad retirement income; Supplemental Security Income (SSI); public assistance or welfare payments; retirement, survivor, or disability pensions; and all other income.

Receipts from the following sources are not included as income: capital gains, money received from the sale of property (unless the recipient was engaged in the business of selling such property); the value of income “in kind” from food stamps, public housing subsidies, medical care, or employer contributions for individuals; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; and gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Median income. The median divides the income distribution into two equal parts. Half of all cases are below the median income and half are above the median income. For households, the median income is based on the distribution of the total number of households including those with no income. Median income for households is computed on the basis of a standard distribution with a minimum value of less than \$2,500 and a maximum value of \$200,000 or more, and is rounded to the nearest whole dollar. Median income figures are calculated using linear interpolation if the width of the interval containing the estimate is \$2,500 or less. If the width of the interval containing the estimate is greater than \$2,500, Pareto interpolation is used.

The data on **poverty status of households** were derived from answers to the income questions. The income items were asked on a sample basis. Since poverty is defined at the family level and not the household level, the poverty status of the household is determined by the poverty status of the householder. Households are classified as poor when the total income of the householder’s family in calendar year 1999 is below the appropriate poverty threshold. (For nonfamily householders, the person’s income is compared with the appropriate threshold.) The income of persons living in the household who are unrelated to the householder is not considered when determining the poverty status of a household, nor does their presence affect the family size in determining the appropriate threshold. The poverty thresholds vary depending upon three criteria: size of family, number of children, and, for one- and two-person families, age of the householder.

Table 1. Poverty Threshold, by Size of Family, 1999
(Dollars.)

Size of family unit	Weighted average threshold
One person (unrelated individual)	8,501
Under 65 years old	8,667
65 years and over old and over	7,990
Two persons	10,869
Householder under 65 years old	11,214
Householder 65 years old and over	10,075
Three persons	13,290
Four persons	17,029
Five persons	20,127
Six persons	22,727
Seven persons	25,912
Eight persons	28,967
Nine persons or more	34,417

EDUCATIONAL ATTAINMENT, Items 11 and 12
Source: U.S. Census Bureau—2000 Census of Population and Housing

Data on **educational attainment** are tabulated for the population 25 years old and over. The question included instructions for persons currently enrolled in school to report the level of the previous grade attended or the highest degree received.

Vocational and technical training, such as barber school training; business, trade, technical, and vocational schools; or other training for a specific trade are specifically excluded.

High school graduate or less. This category includes persons whose highest degree was a high school diploma or its equivalent, and those who reported any level lower than a high school diploma.

Bachelor’s degree or more. This category includes persons who have received bachelor’s degrees, master’s degrees, professional school degrees (such as law school or medical school), and doctorate degrees.

EMPLOYMENT STATUS, Items 13 and 14

Source: U.S. Census Bureau—2000 Census of Population and Housing

The data on **employment status** refer to work during the week immediately preceding Census Day. The employment status data shown in Census 2000 tabulations relate to persons 16 years old and over.

Employed. All civilians 16 years old and over were classified as employed if they were either (1) “at work”—those who did any work at all during the reference week as paid employees, worked in their own business or profession, worked on their own farm, or worked 15 hours or more as unpaid workers on a family farm or in a family business; or (2) were “with a job but not at work”—those who did not work during the reference week, but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, industrial dispute, vacation, or other personal reasons. Excluded from the employed are people whose only activity consisted of work around their own house (e.g., painting, repairing, or housework) or unpaid volunteer work for religious, charitable, and similar organizations. Also excluded are all institutionalized persons and persons on active duty in the United States Armed Forces.

Unemployed. All civilians 16 years old and over were classified as unemployed if they were neither “at work” nor “with a job but not at work” during the reference week, were looking for work during the last 4 weeks, and were available to start a job. Also included as unemployed were civilians 16 years old and over who did not work at all during the reference week, were on temporary layoff from a job, had been informed that they would be recalled to work within the next 6 months or had been given a date to return to work, and were available to return to work during the reference week, except for temporary illness. Examples of job seeking activities were:

- registering at a public or private employment office
- meeting with prospective employers
- investigating possibilities for starting a professional practice or opening a business
- placing or answering advertisements
- writing letters of application
- being on a union or professional register

Labor force. The labor force consisted of all persons classified in the civilian labor force (that is, “employed” and “unemployed” persons), plus members of the United States Armed Forces (persons on active duty with the United States Army, Air Force, Navy, Marine Corps, or Coast Guard).

Not in labor force. This group was made up of all persons 16 years old and over who were not classified as members of the labor force and consisted mainly of students, individuals taking care of home or family, retired workers, seasonal workers enumerated in an off-season who were not looking for work, institutionalized persons (all institutionalized persons are placed in this category regardless of any work activities they may have done in the reference week), and persons doing only incidental unpaid family work (fewer than 15 hours during the reference week).

HOUSEHOLDS, Items 15 and 16

Source: U.S. Census Bureau—2000 Census of Population and Housing

A **household** includes all of the persons who occupy a housing unit. (Persons not living in households are classified as living in group quarters.) A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room occupied (or if vacant, intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living quarters.

A **family** includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. All persons in a household who are related to the householder are regarded as members of his or her family. A **family household** may contain persons not related to the householder. Thus, family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families, as a household may comprise a group of unrelated persons or of one person living alone. Families are classified by type as either a “married-couple family” or “other family” according to the presence of a spouse.

CRIME, Items 17–20

Source: U.S. Federal Bureau of Investigation—Uniform Crime Reports

Crime data are as reported to the Federal Bureau of Investigation (FBI) by law enforcement agencies and have not been adjusted for under reporting. This may affect comparability between geographic areas or over time.

Through the voluntary contribution of crime statistics by law enforcement agencies across the United States, the Uniform Crime Reporting (UCR) Program provides periodic assessments of crime in the nation as measured by those offenses that come to the attention of the law enforcement community. The Committee on Uniform Crime Records of the International Association of Chiefs of Police initiated this voluntary national data collection effort in 1930. The UCR Program contributors compile and submit their crime data in one of two manners: directly to the FBI or through state-level UCR Programs.

Seven offenses, because of their seriousness, frequency of occurrence, and likelihood of being reported to police, were initially selected to serve as an index for evaluating fluctuations in the volume of crime. These serious crimes were murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth index offense in 1979. The totals shown in this volume do not include arson.

In 2004, the FBI discontinued the use of the Crime Index in the UCR Program and its publications, stating that the Crime Index was driven upward by the offense with the highest number (in this case, larceny-theft) creating a bias against jurisdictions with a high number of larceny-thefts but a low number of other serious crimes such as murder and forcible rape. The FBI is currently publishing a violent crime total and a property crime total until a more viable index is developed. In this book, the total Crime Index is included along with violent crime and property crime rates.

Violent offenses include four crime categories: (1) Murder and nonnegligent manslaughter, as defined in the UCR Program, is the willful (nonnegligent) killing of one human being by another. This offense excludes deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder. (2) Forcible rape is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded. (3) Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. (4) Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by other means likely to produce death or great bodily harm. Attempts are included since any injury does not necessarily have to result when a gun, knife, or other weapon is used, as these incidents could and probably would have resulted in a serious personal injury if the crime were successfully completed.

Property crimes include three categories: (1) Burglary, or breaking and entering, is the unlawful entry of a structure to commit a felony or theft, even though no force was used to gain entrance. (2) Larceny-theft is the unauthorized taking of the personal property of another, without the use of force. (3) Motor vehicle theft is the unauthorized taking of any motor vehicle.

Rates are based on population estimates provided by the FBI. If a city is not in the UCR database, or if the population of the crime-reporting unit is less than 75 percent of the city's 2004 estimated population, the data for that area are considered not available. For some states, reporting is not sufficiently complete to be representative of the state as a whole. The FBI has estimated totals for those states.

CONSTRUCTION—BUILDING PERMITS, Items 21–23

**Source: U.S. Census Bureau—Building
Permits Survey**

These figures represent private residential construction authorized by building permits in approximately 20,000 places in the United States. Valuation represents the cost of construction as recorded on the building permit. This figure usually excludes the cost of on-site and off-site development and improvements

and the cost of heating, plumbing, electrical, and elevator installations.

If a city is not a permit-issuing place covered by the Census Bureau, “NA” is shown. Permit-issuing places that issued no permits during the period are represented by “0.”

Residential building permits include buildings with any number of housing units. Hotels, apartment hotels, dormitories, fraternity houses, and other non-housekeeping residential buildings are not included.

Statistics are based upon reports submitted by local building permit officials in response to a mail survey. Approximately 9,000 of the 20,000 permit-issuing places in the United States are surveyed monthly; the remainder is surveyed annually. State totals include imputed data.

LOCAL GOVERNMENT FINANCES, Items 24–31

Source: U.S. Census Bureau—2002 Census of Governments: Finance Statistics

Total **general revenue** includes all governmental revenue except utility, liquor store, and employee-retirement or other insurance trust revenue. It includes all tax collections and intergovernmental revenue, even if designated for employee-retirement or local utility purposes.

Intergovernmental revenue consists of amounts received from other governments as fiscal aid in the form of shared revenues and grants-in-aid, as reimbursements for performance of general expenditure functions, and specific services for the paying government (e.g., care of prisoners or contractual research) of amounts in lieu of taxes. It excludes amounts received from other governments for sale of property, commodities, and utility services. All intergovernmental revenue is classified as general revenue. Intergovernmental revenue from the state government includes amounts originally from the federal government but channeled through the state.

Taxes are compulsory contributions exacted by a government for public purposes, and exclude employee and employer assessments for retirement and social insurance purposes, which are classified as insurance trust revenue. All tax revenue is classified as general revenue and comprises amounts received (including interest and penalties but excluding protested amounts and refunds) from all taxes imposed by a government. Local government tax revenue excludes any amounts from shares of state-imposed and collected taxes, which are classified as intergovernmental revenue.

Total **general expenditure** includes all city expenditure other than the specifically enumerated kinds of expenditure classified as utility, liquor store, and employee-retirement and other insurance trust expenditures.

Capital outlays are direct expenditures for contract or force account construction of buildings, roads, and other improvements, and for purchases of equipment, land, and existing structures. They include amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditures for repairs to such works and structures is classified as current operation expenditures.

A major portion of capital outlay is commonly financed by borrowing, while government revenue does not include receipts from borrowing. Among other things, this distorts the relationship between the totals presented for revenue and expenditures and renders this relationship useless as a direct measure of the degree of budgetary “balance” (as that term is generally applied).

Total **debt outstanding** is the total of all debt obligations remaining unpaid on the date specified.

TABLE C
INCORPORATED PLACES OF 2,500
OR MORE POPULATION

Table C presents data from the Census Bureau’s 2002 Economic Census for incorporated places with a 2000 census population of 2,500 or more. Also included in the 2002 Economic Census are towns in the six New England states, New York, and Wisconsin, and townships in Michigan, Minnesota, New Jersey, and Pennsylvania with a 2000 census population of 10,000 or more. These towns and townships are the same minor civil divisions (MCDs) that are included in Tables A and B. For Hawaii, data are provided for Census designated places (CDPs) with 2,500 or more inhabitants.

The Economic Census provides a detailed portrait of the nation’s economy once every five years, from the national to the local level. The 2002 Economic Census covers nearly all of the U.S. economy in its basic collection of establishment statistics. In 1997, it began use of the new North American Industry Classification System (NAICS) and therefore data are not comparable to economic data from prior years, which were based on the Standard Industrial Classification (SIC) system.

NAICS, developed in cooperation with Canada and Mexico, classifies North America’s economic activities at two-, three-, four-, and five-digit levels of detail, and the U.S. version of NAICS further defines industries to a sixth digit. The Economic Census takes advantage of this hierarchy to publish data at these successive levels of detail: sector (two-digit); subsector (three-digit); industry group (four-digit); industry (five-digit); and U.S. industry (six-digit). This volume includes data at the two-digit level.

MANUFACTURING, Items 1–12
Source: U.S. Census Bureau—2002
Economic Census

The Manufacturing sector (31–33) comprises establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases in which the activity is appropriately classified in the Construction sector. Establishments in the Manufacturing sector are often described as plants, factories, or mills and characteristically use power-driven machines and materials-handling equipment. However, establishments that transform materials or substances into new products by hand or in the worker’s home, as well as those engaged in selling products made on the same premises from which they are sold to the general public, such as bakeries, candy stores, and custom tailors, may also be included in this sector. Manufacturing establishments may process materials or may contract with other establishments to process their materials for them. Both types of establishments are included in Manufacturing.

The materials, substances, or components transformed by manufacturing establishments are raw materials that are products of agriculture, forestry, fishing, mining, or quarrying, or are products of other manufacturing establishments. The materials used may be purchased directly from producers, obtained through customary trade channels, or secured without recourse to the market by transferring the product from one establishment to another under the same ownership. The new product of a manufacturing establishment may be finished in the sense that it is ready for utilization or consumption, or it may be semifinished and become an input for an establishment engaged in further manufacturing. For example, the product of an alumina refinery is the input for the primary production of aluminum, primary aluminum is the input used in an aluminum wire drawing plant, and aluminum wire is the input used in a fabricated wire product manufacturing establishment.

Data are included only for cities with 500 or more employees in the Manufacturing sector.

Number of establishments. An establishment is defined as a single physical location where manufacturing is performed. On the other hand, a company is defined as a business organization consisting of one establishment or more under common ownership or control. If the company operated at different physical locations, even if the individual locations were producing the same line of goods, a separate report was requested for each location. If the company operated in two or more distinct lines of manufacturing at the same location, a separate report was requested for each activity. An establishment not in operation for any portion of the year was requested to return the report form with the proper notation in the “Operational Status” section of the form. In addition, the establishment was requested to report data on any employees, capital expenditures, inventories, or shipments from inventories during the year.

Employees. This item includes all full-time and part-time employees on the payrolls of operating manufacturing establishments during any part of the pay period that included the 12th day of the months specified on the report form. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded. The number of employees is the average number of production workers plus the number of other employees in mid-March. The number of production workers is the average for the payroll periods including the 12th days of March, May, August, and November.

Payroll. This item includes the gross earnings of all employees on the payrolls of operating manufacturing establishments paid during the calendar year. Respondents were told they could follow the definition of payrolls used for calculating the federal withholding tax. Payroll includes all forms of compensation, such as salaries, wages, commissions, dismissal pay, bonuses, vacation pay, sick-leave pay, and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations but excludes payments to proprietors or partners of unincorporated concerns. Payments to members of the armed forces and pensioners carried on the active payrolls of manufacturing establishments are also excluded.

Production workers. This item includes workers (up through the line-supervisor level) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plants), record keeping, and other services closely associated with these production operations at the establishment covered by the report. Employees above the working-supervisor level are excluded from this item.

Production-worker hours. This item covers hours worked or paid for at the plant, including actual overtime hours (not straight-time equivalent hours). It excludes hours paid for vacations, holidays, or sick leave.

Value added. This measure of manufacturing activity is derived by subtracting the cost of materials, supplies, containers, fuel, purchased electricity, and contract work from the value of shipments (products manufactured plus receipts for services rendered). The result of this calculation is adjusted by the addition of value added by merchandising operations (i.e., the difference between the sales value and the cost of merchandise sold without further manufacture, processing, or assembly) plus the net change in finished goods and work-in-process between the beginning-of-the-year and end-of-the-year inventories. For those industries where value of production is collected instead of value of shipments, value added is adjusted only for the change in work-in-process inventories between the beginning and end of year. For those industries where value of work done is collected, the value added does not include an adjustment for the change in finished goods or work-in-process inventories. Value added avoids the

duplication in the figure for value of shipments that results from the use of products of some establishments as materials by others. It is considered to be the best value measure available for comparing the relative economic importance of manufacturing among industries and geographic areas.

Cost of materials. This term refers to direct charges actually paid or payable for items consumed or put into production during the year, including freight charges and other direct charges incurred by the establishment in acquiring these materials. It includes the cost of materials or fuel consumed, whether purchased by the individual establishment from other companies, transferred to it from other establishments of the same company, or withdrawn from inventory during the year. Included in this item are such items as cost of parts, cost of fuels, purchased electricity, and contract work.

Value of shipments. This item covers the received or receivable net selling values—freight on board (f.o.b.) plant (exclusive of freight and taxes)—of all primary and secondary products shipped, as well as all miscellaneous receipts, such as those for contract work performed for others, installation and repair, sales of scrap, and sales of products bought and sold without further processing. Included are all items made by or for the establishments from material owned by it, whether sold, transferred to other plants of the same company, or shipped on consignment. The net selling value of products made in one plant on a contract basis from materials owned by another was reported by the plant providing the materials.

Total capital expenditures. For establishments in operation and any known plants under construction, manufacturers were asked to report their new and used expenditures for (1) permanent additions and major alterations to manufacturing establishments and (2) machinery and equipment used for replacement and additions to plant capacity (if they were of the type for which depreciation accounts were ordinarily maintained). Totals for expenditures include the costs of assets leased from nonmanufacturing concerns through capital leases. New facilities owned by the federal government but operated under contract by private companies and plant and equipment furnished to the manufacturer by communities and nonprofit organizations are excluded. Expenditures for land and cost of maintenance and repairs charged as current operating expenses are also excluded.

For any equipment or structure transferred for the use of the reporting establishment by the parent company or one of its subsidiaries, the value at which it was transferred to the establishment was to be reported. If an establishment changed ownership during the year, the cost of the fixed assets (buildings and equipment) was to be reported.

RETAIL TRADE, Items 13–16

Source: U.S. Census Bureau—2002 Economic Census

The Retail Trade sector (44–45) comprises establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise.

The retailing process is the final step in the distribution of merchandise; therefore, retailers are organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: store and nonstore retailers.

Store retailers operate fixed point-of-sale locations designed to attract a high volume of walk-in customers. In general, retail stores have extensive displays of merchandise and use mass-media advertising to attract customers. They typically sell merchandise to the general public for personal or household consumption; some also serve business and institutional clients. These include establishments such as office supply stores, computer and software stores, plumbing supply stores, electrical supply stores, and building materials dealers. Catalog showrooms, gasoline service stations, automotive dealers, and mobile home dealers are treated as store retailers.

In addition to retailing merchandise, some types of store retailers are also engaged in the provision of after-sales services, such as repair and installation. For example, new automobile dealers, electronic and appliance stores, and musical instrument and supply stores often provide repair services. As a general rule, establishments engaged in retailing merchandise and providing after-sales services are classified in this sector.

Nonstore retailers, like store retailers, are organized to serve the general public, although their retailing methods differ. The establishments of this subsector reach customers and market merchandise with methods including the broadcasting of infomercials, the broadcasting and publishing of direct-response advertising, the publishing of paper and electronic catalogs, door-to-door solicitation, in-home demonstrations, selling from portable stalls (street vendors, except food), and distribution through vending machines. Establishments engaged in the direct sale (nonstore) of products, such as home heating oil dealers and home-delivery newspaper routes, are included in this sector.

The buying of goods for resale is a characteristic of retail trade establishments that particularly distinguishes them from establishments in the Agriculture, Manufacturing, and Construction sectors. For example, farms that sell their products at or from the point of production are classified in Agriculture rather than Retail Trade. Similarly, establishments that both manufacture and sell their products to the general public are classified in Manufacturing instead of Retail Trade. However, establishments that engage in processing activities incidental to retailing are classified in Retail Trade.

Number of establishments. An establishment is a single physical location at which business is conducted. It is not necessarily identical to a company or enterprise, which may consist of one establishment or more. The retail trade figures represent a summary of reports for individual establishments rather than companies. For cases where a Census report was received, separate information was obtained for each location where business was conducted. When administrative records of other federal agencies were used instead of a Census report, no information was available on the number of locations operated. Each retail trade establishment was tabulated according to the physical location at

which the business was conducted. The count of establishments represented those in business at any time during 2002. When two activities or more were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment. The entire establishment was classified on the basis of its major activity and all its data were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, separate establishment reports for each of the different activities were obtained in the Economic Census.

Sales. This category includes merchandise sold for cash or credit at retail and wholesale by establishments primarily engaged in retail trade; amounts received from customers for layaway purchases; receipts from rentals of vehicles, equipment, instruments, tools, etc.; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; the total value of service contracts; and gasoline, liquor, tobacco, and other excise taxes paid by the manufacturer or wholesaler and passed on to the retailer. Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from sales. Sales do not include carrying or other credit charges; sales (or other) taxes collected from customers and forwarded to taxing authorities; gross sales and receipts of departments or concessions operated by other companies; and commissions or receipts from the sale of government lottery tickets. Sales also do not include retail sales made by manufacturers, wholesalers, service establishments, or other businesses whose primary activity is not retail trade. They do include receipts other than those from the sale of merchandise at retail (e.g., service receipts), sales to industrial users, and sales to other retailers, by establishments primarily engaged in retail trade.

Number of employees. Paid employees consist of full-time and part-time employees, including salaried officers and executives of corporations. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses.

Payroll. Payroll includes all forms of compensation, such as salaries, wages, commissions, dismissal pay, bonuses, vacation pay, sick-leave pay, and employee contributions to qualified pension plans paid during the year to all employees. For corporations, payroll includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for Social Security, income tax, insurance, union dues, etc. This definition of payroll is the same as that used on Internal Revenue Service (IRS) Form 941.

HEALTH CARE AND SOCIAL ASSISTANCE, Items 17–20

Source: U.S. Census Bureau—2002 Economic Census

The Health Care and Social Assistance sector (62) comprises establishments that provide health care and social assistance services to individuals. The sector includes both health care

and social assistance, as it is sometimes difficult to distinguish between the boundaries of these two activities. The industries in this sector are arranged on a continuum starting with those that provide medical care exclusively, segueing into those that provide health care and social assistance, and finishing with those that provide only social assistance. The services provided by establishments in this sector are delivered by trained professionals. All industries in the sector share this commonality of process—namely, labor inputs of health practitioners or social workers with the requisite expertise. Many of the industries in the sector are defined based on the educational degree held by the practitioners included in the industry. In this volume, all establishments are included, but separate data are available for establishments subject to federal income tax.

Number of establishments. An establishment is a single physical location at which business is conducted. It is not necessarily identical to a company or enterprise, which may consist of one establishment or more. Economic Census figures represent a summary of reports for individual establishments rather than companies. The count of establishments represents those in business at any time during 2002. For cases in which a Census report was received, separate information was obtained for each location where business was conducted. When administrative records of other federal agencies were used instead of a Census report, no information was available on the number of locations operated. Each Economic Census establishment was tabulated according to the physical location at which the business was conducted.

When two activities or more were carried on at a single location under a single ownership, all activities were generally grouped together as a single establishment. The entire establishment was classified on the basis of its major activity and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, separate establishment reports for each of the different activities were obtained in the Economic Census.

Receipts/revenue. Receipts are basic dollar volume measure for service establishments of firms subject to federal income tax. This classification includes receipts from customers or clients for services rendered, from the use of facilities, and from merchandise sold during 2002, whether or not payment was received in 2002. For advertising agencies, travel industries, and other service establishments operating on a commission basis, receipts include commissions, fees, and other operating income, and exclude gross billings and sales. Excise taxes on gasoline, liquor, tobacco, etc., which are paid by the manufacturer or wholesaler and passed on in the cost of goods purchased by the service establishment, are included. The establishments share of receipts from departments, concessions, and vending and amusement machines operated by others are included as part of receipts. Receipts also include the total value of service contracts, market value of compensation received in lieu of cash, amounts received for work subcontracted to others, and dues and assessments from members and affiliates. Receipts from services provided to foreign customers from U.S. locations (including services performed

for foreign parent firms, subsidiaries, and branches) are included; they are net after deductions for refunds and allowances for merchandise returned by customers. Receipts do not include sales, occupancy, admissions, or other taxes collected from customers and remitted directly by the firm to a local, state, or federal tax agency, nor do they include income from such sources as contributions, gifts, and grants; dividends, interest, and investments; or sales or rentals of real estate. Also excluded are receipts (gross) of departments and concessions operated by others, sales of used equipment rented or leased to customers, domestic intra-company transfers, receipts of foreign subsidiaries, and other nonoperating income, such as royalties and franchise fees. Receipts do not include service receipts of manufacturers, wholesalers, retail establishments, or other businesses whose primary activity is not service. However, they do include receipts other than from services rendered (e.g., sale of merchandise to individuals or other businesses) by establishments primarily engaged in performing services and classified in the service industries.

Number of employees. Paid employees consist of full-time and part-time employees, including salaried officers and executives of corporations. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses. The definition of paid employees is the same as that used on IRS Form 941.

Payroll. Payroll includes all forms of compensation such as salaries, wages, commissions, dismissal pay, bonuses, vacation pay, sick-leave pay, and employee contributions to qualified pension plans paid during the year to all employees. For corporations, payroll includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for Social Security, income tax, insurance, union dues, etc. This definition of payroll is the same as that used by the IRS.

PROFESSIONAL, SCIENTIFIC, AND TECHNICAL SERVICES, Items 21–24

Source: U.S. Census Bureau—2002 Economic Census

The Professional, Scientific, and Technical Services sector (54) comprises establishments that specialize in performing professional, scientific, and technical activities for others. These activities require a high degree of expertise and training. The establishments in this sector specialize according to expertise and provide services to clients in a variety of industries (and, in some cases, to households). Activities performed include legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services.

This volume includes all establishments, but separate data are available for establishments subject to federal income tax.

This sector excludes establishments primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and record keeping, personnel, and physical distribution and logistics. These establishments are classified in sector 56, Administrative and Support and Waste Management and Remediation Services.

Number of establishments. An establishment is a single physical location at which business is conducted. It is not necessarily identical to a company or enterprise, which may consist of one establishment or more. Economic Census figures represent a summary of reports for individual establishments rather than companies. The count of establishments represents those in business at any time during 2002. For cases in which a Census report was received, separate information was obtained for each location where business was conducted. When administrative records of other federal agencies were used instead of a Census report, no information was available on the number of locations operated. Each Economic Census establishment was tabulated according to the physical location at which the business was conducted.

When two activities or more were carried on at a single location under a single ownership, all activities were generally grouped together as a single establishment. The entire establishment was classified on the basis of its major activity and all its data were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, separate establishment reports for each of the different activities were obtained in the Economic Census.

Receipts/revenue. Receipts are basic dollar volume measure for service establishments of firms subject to federal income tax. This classification includes receipts from customers or clients for services rendered, from the use of facilities, and from merchandise sold during 2002, whether or not payment was received in 2002. For advertising agencies, travel industries, and other service establishments operating on a commission basis, receipts include commissions, fees, and other operating income, and exclude gross billings and sales. Excise taxes on gasoline, liquor, tobacco, etc., which are paid by the manufacturer or wholesaler and passed on in the cost of goods purchased by the service establishment, are also included. The establishments share of

receipts from departments, concessions, and vending and amusement machines operated by others are included as part of receipts. Receipts also include the total value of service contracts, market value of compensation received in lieu of cash, amounts received for work subcontracted to others, and dues and assessments from members and affiliates. Receipts from services provided to foreign customers from U.S. locations (including services performed for foreign parent firms, subsidiaries, and branches) are included; they are net after deductions for refunds and allowances for merchandise returned by customers. Receipts do not include sales, occupancy, admissions, or other taxes collected from customers and remitted directly by the firm to a local, state, or federal tax agency, nor do they include income from such sources as contributions, gifts, and grants; dividends, interest, and investments; or sales or rentals of real estate. Also excluded are receipts (gross) of departments and concessions that are operated by others; sales of used equipment rented or leased to customers, domestic intracompany transfers, receipts of foreign subsidiaries, and other nonoperating income, such as royalties and franchise fees. Receipts do not include service receipts of manufacturers, wholesalers, retail establishments, or other businesses whose primary activity is not service. However, they do include receipts other than from services rendered (e.g., sale of merchandise to individuals or other businesses) by establishments primarily engaged in performing services and classified among the service industries.

Number of employees. Paid employees consist of full-time and part-time employees, including salaried officers and executives of corporations. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses.

Payroll. Payroll includes all forms of compensation such as salaries, wages, commissions, dismissal pay, bonuses, vacation pay, sick-leave pay, and employee contributions to qualified pension plans paid during the year to all employees. For corporations, payroll includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for Social Security, income tax, insurance, union dues, etc.
