ABOUT THE EDITORS

Deirdre A. Gaquin has been a data use consultant to private organizations, government agencies, and universities for over 20 years. Prior to that, she was Director of Data Access Services at Data Use & Access Laboratories, a pioneer in private sector distribution of federal statistical data. A former president of the Association of Public Data Users, Ms. Gaquin has served on numerous boards, panels, and task forces concerned with federal statistical data and has worked on four decennial censuses. She holds a Master of Urban Planning (M.U.P.) degree from Hunter College. Ms. Gaquin is also an editor of Bernan Press's *The Who, What, and Where of America: Understanding the Census Results*; and *The Almanac of American Education*.

Katherine A. DeBrandt is a data analyst team leader with Bernan Press. She received her B.A. in political science from Colgate University. She is also a co-editor of *The Who, What, and Where of America: Understanding the Census Results*; *The Almanac of American Education*; and *Social Change in America: The Historical Handbook*, all published by Bernan Press.

ACKNOWLEDGMENTS

The editors of *Places, Towns and Townships* extend their appreciation to Courtenay Slater and the late George Hall, the originators of this publication.

We are extremely grateful to Jo A. Wilson, Bernan Press's production team leader, for managing the production aspects of this volume and preparing the graphics. Production coordinator Rebecca Zayas capably assisted Jo with this project. We

also appreciate the assistance of staff editor Shana Hertz, who copyedited this volume. With support from Automated Graphics Systems, Jo, Rebecca, and Shana assisted the editors tremendously with finalizing this special edition.

As always, we are especially grateful to the many federal agency personnel who assisted us in obtaining the data, provided excellent resources on their Web sites, and patiently answered our questions.

INTRODUCTION

Places, Towns and Townships contains statistical information about places in the United States and the people who live in them. Data are presented for all incorporated places covered by the 2005 population estimates—from the largest city to the smallest village—and for all Census designated places (CDPs) included in the 2000 census. CDPs are unincorporated areas of relatively dense population for which boundaries were established by the U.S. Census Bureau in cooperation with state agencies and local census statistical area committees. Data are also provided in this volume for minor civil divisions (MCDs) in the 12 states where MCDs serve as general-purpose local governments. MCDs are primary subdivisions of counties and are often called towns or townships.¹

This book is divided into three tables. Table A presents limited 2000 census population and housing data for all of the nearly 34,000 places (MCDs, CDPs, and incorporated places) in the United States, including updated population estimates for 2005. Table B includes 2005 population estimates and 2000 census data, plus the most recent available information on crime, residential construction, and local government finances. Table B covers all incorporated places and MCDs with 2005 population estimates of 10,000 or more. Table C provides data from the 2002 Economic Census for incorporated places with populations of 2,500 or more and MCDs with populations of 10,000 or more. Within each table, data are presented alphabetically by state, with place names listed alphabetically within each state.

AN OVERVIEW OF PLACES

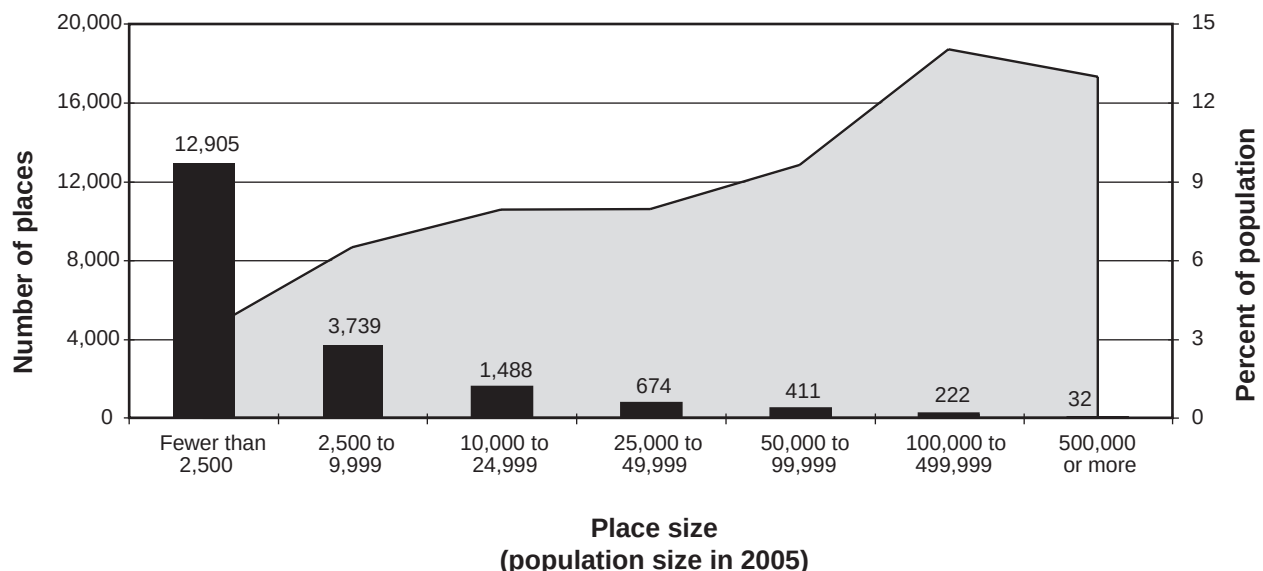

Tables 1 and 2 provide estimates, by state, of the 2005 population living in incorporated places and those living outside of places. While nearly 16 percent of the population lived in the nation's 50 largest cities, 38 percent lived in areas that were not incorporated as places in 2005.

Figure 1 illustrates the distribution of incorporated places by population size. Nearly two-thirds of all places fell into the smallest size category of populations of fewer than 2,500 persons. Eighty-five percent had populations of fewer than 10,000 persons. As place size increased, the number of places within the size class dropped markedly. Only 254 incorporated places had populations of 100,000 or more, an increase from 238 places in 2000. Thirty-two cities had populations of 500,000 or more, up from 29 cities in 2000.

The distribution of the population living in incorporated places was quite different from the distribution of the number of places. Figure 1 shows that the largest population grouping consisted of persons living in medium-sized places. One out of four persons lived in places of 10,000 to 100,000 people in 2005. Another 14 percent lived in places with populations of 100,000 to 499,999.

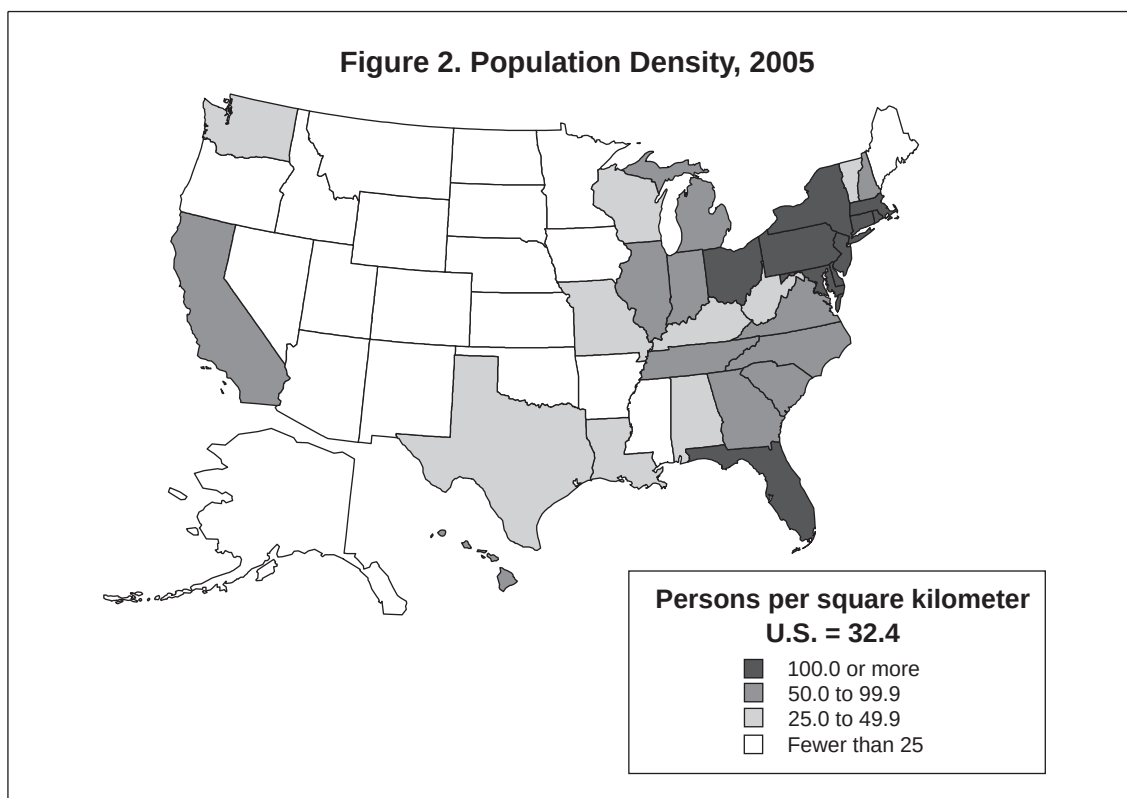

Figure 2 represents the population density of the states, with the more densely populated states on the East and West Coasts

Figure 1. Number of Places and Population Distribution, 2005

¹See Appendix A for more complete definitions of CDPs and MCDs and a list of the 12 states for which MCD data are provided.

Figure 2. Population Density, 2005

and in the Midwest. The lower-density Rocky Mountain and Plains states contain many of the nearly 13,000 places with fewer than 2,500 persons. Densely populated states tend to have larger cities.

City size and growth patterns vary from state to state. Most of the older large cities on the East Coast consolidated or annexed territory and grew to their current geographic boundaries more than 100 years ago. In the early years of the 21st century, many of these older cities have been losing population, while some of their suburban counties have experienced high levels of growth. At the same time, many large Western cities have continued to annex territory, with development at the edges of these cities helping to accommodate their growing populations. For example, the land area of San Antonio, TX, increased by 22 percent between 1990 and 2000; the city has continued to annex new areas since 2000. Some cities have altered their boundaries through consolidation with surrounding areas. In 2003, Louisville, KY, consolidated its governmental functions with the surrounding county, forming the consolidated city Louisville-Jefferson County. Because of this, Louisville-Jefferson County ranked as the 16th largest city in 2005, a significant jump from its position as the 65th largest city at the time of the 2000 census.

There have been some changes in the population of the 50 largest cities in the United States since the 2000 census, as shown in Table 3. New York, Los Angeles, Chicago, Houston, and Philadelphia were the five largest cities in 2005—as they have been since the 1990 census—but the composition of the top 10 cities shifted. Phoenix retained its 2000 rank as the 6th largest city, but San Antonio jumped ahead of San Diego

and Dallas to take the 7th-place spot. San Jose, CA, moved up to 10th place, pushing Detroit out of the top 10 for the first time in nearly 100 years. The top 10 cities in 2005 included 3 from California and 3 from Texas. Eight of the 50 largest cities experienced growth rates of 10 percent or higher over the 2000–2005 time period, while 12 large cities lost population during that time. Fort Worth, TX, had the highest growth rate (16.7 percent), moving it from 27th to 20th place. Detroit and New Orleans both lost over 6 percent of their populations between 2000 and 2005. (This estimate was made a few months before Hurricane Katrina, so that disaster was not responsible for this measure of New Orleans’s population loss.)

There were 32 American cities with more than 500,000 people in 2005. These 32 cities represented only 22 states, with 6 in Texas, 4 in California, 2 each in Arizona and Tennessee, and 1 each in 18 other states. Thirteen percent of people in the United States lived in these 32 cities. Forty-two percent of New York State’s population resided in New York City, and one-third of Arizona’s population lived in either Phoenix or Tucson. Between 20 and 30 percent of the populations of Illinois, Tennessee, and Texas lived in cities of 500,000 or more. California, despite its 4 cities in this size category, counted only 19 percent of its population as living in those 4 cities.

At the other end of the spectrum are places with very small populations. There were 29 incorporated places with 10 or fewer people in 2005. Although these were located in 15 states, there were 5 each in North Dakota and South Dakota, 4 in Nebraska, 3 in Missouri, and 2 in Oklahoma.

Nearly 38 percent of the population of the United States lived outside of incorporated places, but this group included very rural locations as well as major metropolitan areas. In the decennial censuses, Census designated places (CDPs) are defined to represent concentrations of population that are identifiable by name but not located in any incorporated place. However, these CDPs are not included in the intercensal population estimates (with the exceptions of Honolulu, HI, and Arlington, VA). There has been increasing awareness that some of these CDPs are major residential and commercial centers. In 2000, the Office of Management and Budget issued new guidelines for defining metropolitan areas, and some unincorporated places are now identified as central cities of metropolitan areas. For example, Bethesda, MD, together with the incorporated cities of Gaithersburg, MD, and Frederick, MD, is now defined as a central city of the Bethesda-Gaithersburg-Frederick, MD Metropolitan Division, in the Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Statistical Area. In the 2000 census, the Bethesda CDP had a population of over 55,000.

In addition to Honolulu, HI, and Arlington, VA, there were 5 CDPs that had more than 100,000 people in 2000. Among incorporated cities of 100,000 or more, Elk Grove, CA (near Sacramento, CA), had the highest growth rate between 2004 and 2005, increasing by 12 percent to a total population of 112,338.² Elk Grove was incorporated on July 1, 2000, and was thus listed as a CDP in the 2000 census. About 50 CDPs had populations of 50,000 or more in the 2000 census, and about 200 CDPs had populations of 25,000 people or more. Most of these were suburbs of major metropolitan areas.

RANKINGS

The rankings present the 50 largest cities by population, land area, population density, race, Hispanic origin, foreign-born population, age, home ownership, college-educated population, income, unemployment rate, poverty rate, per capita local taxes, violent crime rate, health care and manufacturing employment, and average manufacturing wages.

SUBJECTS COVERED

A summary of the subjects covered in Tables A, B, and C appears on page xxvi. Pages xxvii–xxviii show the complete column headings for each table.

SYMBOLS

- D Indicates that the number has been withheld to avoid disclosure of information pertaining to a specific organization or individual, or because the number does not meet statistical standards for publication.
- NA Indicates that data are not available.
- X Indicates that data are not applicable or are not meaningful for this geographic unit.

In this volume, where a figure is less than half the unit of measure shown, it will appear as zero.

SOURCES

The data in this volume have been obtained from federal government sources. For a complete list of sources, see Appendix B.

Data included in this volume meet the publication standards established by the U.S. Census Bureau and the other federal statistical agencies from which they were obtained. Every effort has been made to select data that are accurate, meaningful, and useful. All data from censuses, surveys, and administrative records are subject to errors arising from factors such as sampling variability, reporting errors, incomplete coverage, nonresponse, imputations, and processing error. Responsibility of the editors and publishers of this volume is limited to reasonable care in the reproduction and presentation of data obtained from sources believed to be reliable.
